

Friday 17th April  
WALT: identify the properties of Quadrilaterals

Label the quadrilaterals using the word bank.

Use the criteria to describe the shapes.

four sides	2 pairs of parallel sides	four equal sides
polygon	1 pair of parallel sides	4 right angles

Which criteria can be used more than once?  
 Which shapes share the same criteria?

Draw and label:

- a rhombus.
- a parallelogram.
- 3 different trapeziums

	four sides	2 pairs of parallel sides	4 right angles	polygon
	four sides	2 pairs of parallel sides	four equal sides	polygon
	four sides	1 pair of parallel sides	4 right angles	polygon
	four sides	2 pairs of parallel sides	four equal sides	polygon
	four sides	2 pairs of parallel sides		polygon

Complete each of the boxes in the table with a different quadrilateral.

	4 equal sides	2 pairs of equal sides	1 pair of parallel sides
4 right angles	square	rectangle	
No right angles	rhombus	parallelogram	trapezium

Which box cannot be completed?

Explain why.

*Quadrilaterals with 4 right angles can only be squares or rectangles which both have 2 pairs of parallel sides.*
